

Non-Touch Exit Sensor with Remote Key

Features:

- ✓ Request to exit with simple wave of hand
- ✓ Free from contagious disease spread(Healthy Protection)
- ✓ Ring illuminator that turns from green to red when sensor is activated
- ✓ NO./NC./COM output
- ✓ High capacity of relay dry contact
- ✓ Application: Gate / Door / Automation Control

HS-21 series exit switches adopt optical infrared technology which requires no physical contact, and by the means of 433 MHz RF transceiver technology, the wireless key could unlock the door remotely after configured with HS-21. It is more convenient to open the door for visitors from a faraway place.

Specification:

HS-21

Contact Rating	3A/AC120V, DC30V
Input Volt	DC 12V
Detection Range	Up to 10 cm
Led Indicator	Blue LED: Standby Red LED: Visitor detected
Operating Temperature	-20C ~50C
Dimension(cm)	115*70*29/86*86*45
Remote Key	
Operating Distance	Up to 30m
Working Frequency	433 MHz
Battery	27A 12V alkaline battery

Standalone Configuration:
